

In the Claims

Claims 1 – 19 are pending in this application with claims 1, 8 and 15 - 18 being amended by this response.

1) (Currently Amended) A method for assigning an identifier to at least one of a plurality of displayable task schedules ~~associated with a corresponding plurality of different entities, the identifier representing a task to be performed by an entity,~~ comprising the activities of:

- a. initiating display of at least one interface menu supporting user entry of decision information for assigning a task representative identifier to a particular task schedule of a plurality of displayable task schedules associated with a corresponding plurality of different entities, said particular task schedule being associated with a particular entity of said corresponding plurality of different entities;
- b. receiving decision information entered via ~~the~~ said at least one interface menu; ~~and~~
- c. applying the received decision information ~~in;~~ and
- d. assigning, based on the application of the received decision information, the said task representative identifier representing a task to be performed by said particular entity, to the said task schedule associated with the said particular entity in response to a predetermined event.

2) (Original) A method according to claim 1, wherein

the step of initiating display of the at least one interface menu includes initiating display of menu elements prompting a user to identify at least one of (a) the predetermined event triggering application of the decision information in assigning the task representative identifier to the task schedule, (b) a source of the decision information, (c) decision information comprising a procedure for processing data associated with a task to determine a task schedule for listing the task representative identifier.

3) (Original) A method according to claim 1, wherein

the decision information comprises a logical procedure for processing data associated with a task to identify a task schedule for incorporating the task representative identifier.

Ser. No. 10/007,370

- 4) (Original) A method according to claim 3, wherein
the data associated with a task comprises at least one of (a) a medical procedure identifier for a scheduled procedure, (b) a time and date of performance of a medical procedure, (c) patient medical record information, (d) location of performance of a medical procedure, (e) patient type identifier and (f) patient physical characteristics.
- 5) (Previously Amended) A method according to claim 1, wherein
the entity comprises at least one of (a) a user, (b) a category of users, (c) one or more users currently designated to perform a healthcare worker role and (d) a medical device or system.
- 6) (Original) A method according to claim 1, wherein:
- the decision information identifies the predetermined event and
 - the predetermined event corresponds to at least one of (a) patient admission, (b) beginning of a medical procedure, (c) end of a medical procedure and (d) a user defined event based on information acquired.
- 7) (Original) A method according to claim 1, further including
applying the received decision information in prioritizing a plurality of task representative identifiers of a task schedule associated with a particular entity in response to occurrence of a triggering event.
- 8) (Currently Amended) A method for assigning an identifier to at least one of a plurality of task schedules ~~associated with a corresponding plurality of different entities, the identifier representing a task to be performed by an entity, comprising the activities of:~~
- initiating display of at least one interface menu supporting user entry of decision information for assigning a task representative identifier to a particular task schedule of a plurality of displayable task schedules associated with a corresponding plurality of different entities, said particular task schedule being associated with a particular entity of said corresponding plurality of different entities and accessible by the particular entity, the decision information including:
 - a procedure for processing data associated with a task to identify a task schedule for incorporating the task representative identifier, and
 - an event for triggering application of the procedure in allocating the

Ser. No. 10/007,370

- task representative identifier to the identified task schedule;
- b. receiving decision information entered via the at least one interface menu; ~~and~~
 - c. applying the received decision information in; and
 - d. assigning, based on the application of the received decision information, the said task representative identifier representing a task to be performed by said particular entity, to the said task schedule associated with the said particular entity in response to occurrence of the triggering event.
- 9) (Original) A method according to claim 8, wherein
the data associated with a task comprises at least one of (a) a medical procedure identifier for a scheduled procedure, (b) a time and date of performance of a medical procedure, (c) patient medical record information, (d) location of performance of a medical procedure, (e) patient type identifier and (f) patient physical characteristics.
- 10) (Original) A method according to claim 8, wherein
the triggering event corresponds to at least one of (a) patient admission, (b) beginning of a medical procedure, (c) end of a medical procedure and (d) a user defined event based on acquired information.
- 11) (Original) A method according to claim 8 further including
acquiring the data associated with a task.
- 12) (Original) A method according to claim 8, wherein
- a. the procedure conditions allocation of the task to the task schedule associated with the particular entity upon coincidence of a plurality of occurrences, and
 - b. further including acquiring data to identify the coincidence of the plurality of occurrences.
- 13) (Original) A method according to claim 8, wherein
- a. the triggering event is conditioned upon coincidence of a plurality of occurrences, and
 - b. further including acquiring data to identify the coincidence of the plurality of circumstances.

Ser. No. 10/007,370

14) (Original) A method according to claim 8, further including

applying the received decision information in removing a task representative identifier from the task schedule associated with the particular entity in response to occurrence of a triggering event.

15) (Currently Amended) A method for providing a user interface for assigning an identifier to at least one of a plurality of displayable task schedules ~~associated with a corresponding plurality of different entities, the identifier representing a task to be performed by an entity,~~ comprising the activities of:

- a. in response to a user command,
 - i. initiating display of at least one interface menu supporting user entry of decision information for assigning a task representative identifier to a particular task schedule of a plurality of displayable task schedules associated with a corresponding plurality of different entities, said particular task schedule being associated with a particular entity of said corresponding plurality of different entities; and
 - ii. initiating display of an updated task schedule associated with the particular entity, the updated task schedule being generated in response to applying received decision information, in assigning the said task representative identifier representing a task to be performed by said particular entity, to the said task schedule associated with the said particular entity in response to occurrence of a predetermined event.

16) (Currently Amended) A method for providing a user interface supporting assigning an identifier to at least one of a plurality of task schedules ~~associated with a corresponding plurality of different entities, the identifier representing a task to be performed by an entity,~~ comprising the activities of:

- a. in response to a user command,
 - i. initiating display of at least one interface menu supporting user entry of decision information for assigning a task representative identifier to a particular task schedule of a plurality of displayable task schedules associated with a corresponding plurality of different entities, said particular task schedule being associated with a particular entity of said corresponding plurality of different entities and accessible by the particular entity, the decision information including,
 - ii. a procedure for processing data associated with a task to identify a task schedule for incorporating the task representative identifier, and
 - iii. an event for triggering application of the procedure in allocating the

Ser. No. 10/007,370

- task representative identifier to the identified task schedule; and
- b. initiating display of an updated task schedule associated with the particular entity, the updated task schedule being generated in response to applying received decision information, in assigning ~~the said~~ task representative identifier representing a task to be performed by said particular entity, to ~~the said~~ task schedule associated with ~~the said~~ particular entity in response to occurrence of the triggering event.

17) (Currently Amended) A method for assigning an identifier to at least one of a plurality of task schedules ~~associated with a corresponding plurality of different entities, the identifier representing a task to be performed by an entity~~, comprising the activities of:

- a. initiating display of at least one interface menu supporting user entry of decision information for selectively assigning a task representative identifier to at least one of a plurality of displayable task schedules associated with a corresponding plurality of different entities, said at least one of a plurality of displayable task schedules being associated with a respective one of said corresponding plurality of different entities, the decision information comprising:
 - i. a procedure for processing data associated with a task to identify a task schedule for incorporating the task representative identifier, and
 - ii. an event for triggering application of the procedure in allocating the task representative identifier to the identified task schedule;
- b. receiving decision information entered via the at least one interface menu; ~~and~~
- c. applying the received decision information ~~in~~; and
- d. selectively assigning, based on the application of the received decision information, ~~the said~~ task representative identifier representing a task to be performed by said respective one of said corresponding plurality of different entities, to ~~the said~~ at least one of the plurality of task schedules associated with ~~the said~~ corresponding plurality of different entities in response to occurrence of the triggering event.

18) (Currently Amended) A system for assigning an identifier to at least one of a plurality of displayable task schedules ~~associated with a corresponding plurality of different entities, the identifier representing a task to be performed by an entity~~, comprising:

- a. a display processor for initiating display of at least one interface menu

Ser. No. 10/007,370

supporting user entry of decision information for assigning a task representative identifier to a particular task schedule of a plurality of displayable task schedules associated with a corresponding plurality of different entities, said particular task schedule being associated with a particular entity of said corresponding plurality of different entities;

- b. an interface processor for receiving decision information entered via the at least one interface menu; ~~and~~
- c. a decision processor for applying the received decision information ~~in~~; and
- d. means for assigning the said task representative identifier representing a task to be performed by said particular entity, to the said task schedule associated with the said particular entity in response to a predetermined event.

19) (Original) A computer program embodied within a computer-readable medium created using the method of claim 1.
